

## 4.3 Display Devices

As you study this section, answer the following questions:

- What are some of the specifications used by display devices?
- What are the benefits of a higher resolution?
- What is the refresh rate?

In this section, you will learn to:

- Identify digital and analog connectors by sight
- Select the appropriate display device based on customer requirements and system support
- Configure display properties (including dual monitor support) in Windows, macOS, and Linux

Key terms for this section include the following:

Term	Definition
Color depth	The number of bits used for each color component of a single pixel.
Resolution	A measurement of an image's sharpness and clarity. The more pixels that make up an image, the higher its resolution.

This section helps you prepare for the following certification exam objectives:

Exam	Objective
CompTIA 220-1102	<p>1.6 Given a scenario, use Microsoft Windows Control Panel utilities.</p> <ul style="list-style-type: none"><li>▪ Display/Display Settings<ul style="list-style-type: none"><li>▪ Resolution</li><li>▪ Color depth</li><li>▪ Refresh rate</li></ul></li></ul>
